

GRAND CANINE HOTEL

Spay/Neuter Policy

The Grand Canine Hotel requires all dog guests over one-year-old to be spayed or neutered.

Why?

Intact males and females intermingling pose a risk of unwanted pregnancy!

Intact dogs (both males and females) can disrupt a peaceful play environment due to aggressive play, humping, dominant behavior or being targeted by other dogs who smell their hormones, feel threatened and lash out!

Intact females can cause fighting among competitive suitors!

What if I have a puppy who is waiting to be spayed or neutered for health reasons?

The Grand Canine Hotel understands this philosophy and allows intact puppies under one year of age to come to the Grand Canine Hotel under the following conditions:

- A temperament test is completed and passed
- They are not excessively humping
- They are not displaying dominant behaviors (mounting, neck biting, etc.)
- They are not inspiring dominant behaviors from other dogs due to their intact status
- They are not creating an unsafe play environment
- Their presence is not influencing the overall peacefulness of the group

If you have a puppy who is intact, please also be aware that we might have to play your pup separately from the other dogs.
